

Power socket 230V.

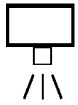

Our company provides a minijack to jack connector to play audio from a laptop.
The theatre must provide an injection box and an XLR cable (mono audio, 1 channel)

2.5m x width

Power socket 230V.

Projector with tripod (is projected from behind)
Our company will provide both a projector and a projector screen.

Screen for projection

3.6m x lenght
2m height

End of stage

Audience

Legend (each venue must be able to supply):

- Sound equipment (depending on the acoustics, we may need a monitor)
- 1 XLR cable and an injection box
- 2 power sockets 230V.
- Black backdrop in the background and blackout on stage are required - if possible, black backdrop on both sides.

The show brings its own lighting equipment, lights and bars are not necessary
Note: this show does not use a smoke machine

In the event of not disposing of elements previously mentioned, must be communicated to the company
